Fresh Graduate in Information Technology from Brawijaya University (GPA 3.90/4.00, Cum Laude). As a results-driven Software Engineer and IT System Analyst, I specialize in end-to-end system analysis, enterprise application development, and IT project management to streamline business workflows and optimize system performance. Committed to leveraging comprehensive technical skills and global certifications to deliver scalable solutions and support operational excellence in dynamic industries.

EDUCATION

Brawijaya University | Associate Degree in Information Technology **2023 - 2026**

- GPA: 3.90 / 4.00 (Cum Laude)
- Relevant Coursework: System Analysis & Design, Software Engineering, Database Systems, Object-Oriented Programming, Computer Networks.

Universiti Teknologi Petronas (UTP) - Malaysia | Student Exchange Program **2024**

- Conducted technical site visits to Petronas industrial operations, observing automation and digital transformation technologies applied in the oil & gas sector.

PROFESSIONAL EXPERIENCE

Dewan Pertimbangan Presiden **Jan - March 2026**
IT System Analyst Intern | Kementerian Sekretariat Negara RI - Jakarta

- Designed and developed SIAPRO (Sistem Informasi Acara dan Protokol), a web-based information system built with Laravel, migrating historical activity data from manual spreadsheets into the platform and replacing manual spreadsheet-based processes to improve operational efficiency and reporting accuracy for council activities and protocol assignments.
- Analyzed business processes within the Protocol Division to identify digital transformation opportunities, translating manual workflows into system requirements for SIAPRO's development.

PT CMLABS INDONESIA DIGITAL **July 2025 - Jan 2026**
IT Project Manager & Frontend Developer Intern | Malang

- Coordinated sprint planning, timeline management, and cross-team collaboration between design and development teams to ensure on-time delivery of enterprise web applications.
- Developed responsive enterprise web application interfaces using Next.js, JavaScript, and REST API integration, translating user experience requirements into functional features.

CERTIFICATION AND LICENSES

Software Engineer **Sept 2026**
Hewlett Packard Enterprise (HPE)

- Applied enterprise software engineering principles to architect, build, and test robust web

services. Focused on secure data processing and automated testing to validate backend performance.

Technology Software Development **Sept 2026**
Citi Bank
- Demonstrated system analysis capabilities through process mapping (UML/State Diagrams) and developing real-time data visualization tools using Java.

Technology Risk **Sept 2026**
EY (Ernst & Young)
- Developed foundational skills in enterprise technology risk assessment, IT governance, and communicating technical impacts to business stakeholders.

IT Support Technician Pathway **Sept 2026**
IBM (International Business Machines Corporation)
- Validated end-to-end IT support and infrastructure skills through 5 digital credentials: Hardware Components & Troubleshooting, Network Protocol & Configuration, Software & Operating Systems, Cloud Computing & Virtualization, and IT Security & Compliance.

Technology **Sept 2026**
Deloitte
- Validated core software development practices, coding logic, and enterprise-level application lifecycle understanding.

Next.js App Router Fundamentals **Oct 2025**
Vercel
- Mastered modern web application architecture and responsive frontend development techniques using Next.js.

Agile & Lean Development Culture **July 2025**
Jago Digital Academy x DKATALIS
- Learned agile project management methodologies and lean principles to optimize IT service delivery and team collaboration.

Microsoft Azure AI Fundamentals (AI-900) **Sept 2025**
Microsoft
- Validated understanding of Artificial Intelligence applications, machine learning concepts, and Azure cloud services integration.

IoT Device Engineer **Jan 2026**
Badan Nasional Sertifikasi Profesi (BNSP)
- Certified in IoT system development, sensor integration, microcontroller configuration (ESP32), and implementation of connected technology for operational monitoring.

Microsoft Office Desktop Application **Dec 2025**
Trust Training Partners (Microsoft Learning Partner)
- Demonstrated high proficiency in data processing, business reporting, and operational documentation using Microsoft Office tools.

ORGANIZATIONAL EXPERIENCE

Eksekutif Mahasiswa Universitas Brawijaya **Aug - Dec 2024**
Staff Kementerian Badan Usaha Milik Mahasiswa
- Supported programs aimed at empowering student-led businesses through entrepreneurship development initiatives.
- Collaborated with cross-functional teams in planning and student development programs.

Unit Aktivitas Bola Basket UABB Universitas Brawijaya **Aug 2024**
Sponsorship Staff - Brawnation 3x3 National Basketball Tournament

- Secured sponsorships worth more than IDR 15 million, contributing approximately 75% of the event's funding target.
- Assisted in proposal preparation, sponsorship acquisition, and partnership coordination to ensure successful event execution.
- Demonstrated strong negotiation, stakeholder management, and adaptability under tight event deadlines

SKILLS

Digital Transformation & Development	:	System Analysis, Full-Stack Web Development (Next.js, Laravel, REST API), Database Management (MySQL, PostgreSQL), Agile Project Coordination.
Data & Process Improvement	:	Data Migration & Integration, Business Process Analysis, Digital Workflow Transformation.
IT Infrastructure & Networking:		Basic Computer Networking, Network Troubleshooting, Hardware Maintenance, IT Support, Operational Monitoring Systems.
Soft Skills	:	Cross-Functional Collaboration, Adaptability to New Operational Environments, Stakeholder Coordination, Analytical Thinking
Languages	:	Advanced English (TOEFL ITP 593), Native Indonesian.
